# Stable Diffusion

## Stable Diffusion v1.5 [81761151] [a9263745]

The Stable-Diffusion-v1-5 checkpoint was initialized with the weights of the Stable-Diffusion-v1-2 checkpoint and subsequently fine-tuned on 595k steps at resolution 512x512 on "laion-aesthetics v2 5+" and 10% dropping of the text-conditioning to improve classifier-free guidance sampling.

Repo <https://huggingface.co/runwayml/stable-diffusion-v1-5>

# Stable Diffusion VAE ft-mse-original

Resumed from ft-EMA and uses EMA weights and was trained for another 280k steps using a re-weighted loss, with more emphasis on MSE reconstruction (producing somewhat "smoother" outputs). To keep compatibility with existing models, only the decoder part was finetuned; the checkpoints can be used as a drop-in replacement for the existing autoencoder.

Repo & Info (with comparisons) <https://huggingface.co/stabilityai/sd-vae-ft-mse-original>

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.  
If you don't know what this is or why you would want it, don't bother with it.

Web

<https://huggingface.co/stabilityai/sd-vae-ft-mse-original/resolve/main/vae-ft-mse-840000-ema-pruned.ckpt>

## Stable Diffusion VAE ft-ema-original

Resumed from the original checkpoint, trained for 313198 steps and uses EMA weights. To keep compatibility with existing models, only the decoder part was finetuned; the checkpoints can be used as a drop-in replacement for the existing autoencoder.  
Repo & Info (with comparisons) <https://huggingface.co/stabilityai/sd-vae-ft-ema-original>

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.  
If you don't know what this is or why you would want it, don't bother with it.

## Stable Diffusion Inpainting v1.5 [3e16efc8]

Repo <https://huggingface.co/runwayml/stable-diffusion-inpainting>  
Intended to be used with <https://github.com/runwayml/stable-diffusion>

The Stable-Diffusion-Inpainting was initialized with the weights of the Stable-Diffusion-v-1-2. First 595k steps regular training, then 440k steps of inpainting training at resolution 512x512 on “laion-aesthetics v2 5+” and 10% dropping of the text-conditioning to improve classifier-free classifier-free guidance sampling. For inpainting, the UNet has 5 additional input channels (4 for the encoded masked-image and 1 for the mask itself) whose weights were zero-initialized after restoring the non-inpainting checkpoint. During training, we generate synthetic masks and in 25% mask everything.

**SHA256** c6bbc15e3224e6973459ba78de4998b80b50112b0ae5b5c67113d56b4e366b19

# Waifu Diffusion

## Waifu Diffusion VAE kl-f8-anime2

A finetune of the SD 1.4 VAE on 250k anime-styled images. Supposedly improves reconstruction of eyes and fingers.

Info <https://twitter.com/haruu1367/status/1579286947519864833>

Repo <https://huggingface.co/hakurei/waifu-diffusion-v1-4>

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.  
If you don't know what this is or why you would want it, don't bother with it.

## Trinart

### trinart\_characters\_19.2m\_stable\_diffusion\_v1 [d64dab7f] + VAE

A stable diffusion v1-based model trained by roughly 19.2M anime/manga style images (pre-rolled augmented images included) plus final finetuning by about 50,000 images. This model seeks for a sweet spot between artistic style versatility and anatomical quality within the given model spec of SDv1. This is the same version 1 model that was released in AI Novelist/TrinArt service from early September through Oct 14. The dataset is filtered to exclude NSFW or unsafe contents.

# SmirkingFace

SmirkingFace is a project that aims to finetune the Stable Diffusion model with high quality erotic content and allow it to generate a large variety of erotic content.  
In case you're uncertain which model you need, the EB 1.0 EMA model tends to perform well in many cases. EBL 1.0 has been trained for the longest, but will require code for our modified model to work (released on our github).  
Note: All our models include the updated MSE VAE released by Stability AI.

# Hentai Diffusion

Repo <https://huggingface.co/Deltaadams/Hentai-Diffusion/tree/main>  
Supposedly will update weekly, so check the repo, it might be more current than this listing.  
The pruned torrents below are with EMA weights removed.

- This model was based on Waifu Diffusion 1.2, and trained on 150,000 images from R34 and gelbooru.
- Focused training has been done of more obscure poses such as crouching and facing away from the viewer, along with a focus on improving hands.
- Using tags from the site in prompts is recommended. Adding 1girl to the start of the prompt will help get better results.

# Bare Feet / Full Body b4\_t16\_noadd [03e33bb4] [2bd8166c] [9012c514]

High quality labels only (the "curated" model).  
Preview grid <https://i.imgur.com/2sJGz3j.jpeg>

A very WIP checkpoint focused on Bare Foot (BF) Full Body (FB) nude female images - best used if you are trying for accurate photorealistic feet or female genitalia, both of which normal SD struggles with  
It is very much WIP  
Extremely specialized, and lost a lot of general purpose capability and ability to stylize.

Yiffy

yiffy-e18.ckpt [50ad914b]

Based on yiffy-e15, trained for a further 3 epochs using a dataset of 210k images from e621.

This will likely be the last epoch for quite some time, because until further improvements to other parts of the network (such as a custom VAE, variable res, etc), we think that further training is not necessary because the model has converged on a decent style for now.  
**IMPORTANT NOTE:** during training explicit was misspelled as **explicit**. Using the misspelled version results in better cocks. Sorry :<

# Zack3D\_Kinky-v1.ckpt [1a75d5c6]

This is a NSFW model trained from SD v1.4, great for general furry but specializes in the kinky side of art such as Transformation, latex, tentacles, goo, ferals, bondage, and a lot more that I cant remember. Uses over 100k images all aesthetics filtered.

Prompt is raw E621 tags, so with underscores.

### r34\_e3.ckpt [57ea6f43]

r34 e3 (fourth epoch). Same dataset, prepended "by" to artist tags, artist recognition has improved a little bit (still needs to get better), character recognition has improved quite a bit.

Web

```
https://mega.nz/file/WVggzbRa#4-pcaLeLN02bdvzUwCn2QQKoLxCC7copAJHYyG4a0B0
```

### r34\_e2.ckpt [778b68b1]

Third epoch, again a pretty nice improvement over the last. Dataset grew by ~3K images, with 5K removed and 8K added.

r34\_e1.ckpt [f9000e4e]

I yeeted about 30K images and then added 20K back from good artists, and lowered the LR significantly to reflect my batch size, I think it's improved significantly but I didn't save any prompts/settings from epoch0 to compare it with.

## sd-wikiart-v2.ckpt. [8f32b8df]

sd-wikiart-v2 is a stable diffusion model that has been fine-tuned on the wikiart dataset to generate artistic images in different style and genres.  
The current model has been fine-tuned with a learning rate of 1e-05 for 1 epoch on 81K text-image pairs from wikiart dataset. Only the attention layers of the model are fine-tuned. This is done to avoid catastrophic forgetting, the model can generate artistic images given specific prompts but still retains most of its previous knowledge.

Info <https://huggingface.co/valhalla/sd-wikiart-v2>

## TestFurry\_5.ckpt [b1f1855e]

Small model, trained with 40k dataset mixed furry and humans (~15k humans and 25k furry). No censorship, no speech bubbles, no comic strips. Gelbooru/e621 mixed tags. 5 epoch (still not finished but can do good results) NSFW!!  
Tags order recommendation - type (furry if furry), character, source, author, race, gender, other description tags.  
Trained on up to 225 tags, with penultimate layer (CLIP 2 in AUTO GUI)

**Torrent**

## Dreambooth

## Hiten girl\_anime\_8k\_wallpaper\_4k.ckpt [7831dea3]

Useful for merging.  
Custom Dreambooth model based off of the artist Hiten. Dataset was 6 training images, and 34 regularization images. Trained for 4000 steps. Uses the Waifu Diffusion v1.2 model as a base.  
To use the model, simply insert the name 'Hiten' into your prompts. The class token used was 'girl\_anime\_8k\_wallpaper'. Append the class token after Hiten for stronger results. EX: "1girl by Hiten girl\_anime\_8k\_wallpaper"  
Info: <https://huggingface.co/BumblinOrange/Hiten>

## Gawr\_Gura\_450img.ckpt [e7883abf]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Hololive Vtuber Gawr Gura. Dataset was 450 training images, and 900 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Gawr Gura' into your prompts.  
Repo: <https://huggingface.co/BumblinOrange/GuraLv400>

Web

[https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr\\_Gura\\_450img.ckpt](https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr_Gura_450img.ckpt)

# Emilia\_CustReg\_3k.ckpt [2660cf9a]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Emilia from Re:Zero. Dataset was 16 training images, and 11 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Emilia' into your prompts. The class token used was 'white\_hair\_girl\_violet\_eyes'. Append the class token after Emilia for stronger results. EX: "A photo of Emilia white\_hair\_girl\_violet\_eyes"  
Repo: <https://huggingface.co/BumblinOrange/Emilia>

[https://huggingface.co/BumblinOrange/Emilia/resolve/main/Emilia\\_CustReg\\_3k.ckpt](https://huggingface.co/BumblinOrange/Emilia/resolve/main/Emilia_CustReg_3k.ckpt)

# Star Fox Krystal

Trained on 90 fan art images for 2500 steps on top of yiffy18. Regulation images were an even mix of about 200 low-quality generations of 4 common anthro species with a spread of gender (a new idea I hope to explain in a forthcoming guide).  
This following bit of text MUST be used in your prompt, or it will do nothing!  
Trigger Phrase `thatbluefoxfromstarfoxkrystal anthro`

**SHA256** 13adea314c8653de231c454fa9e911d80ab04640caf30d752802c9b201d4c243

Blacked POV blowjob [8467f44f]

dreambooth-bkdbj-4000step-pruned-fp16.ckpt

Blacked POV blowjob model, trained for 4000 steps on 70 hand picked photos from [blacked.com](#), trained on top of SD 1.4 model using Dreambooth. Keyword for prompt: bkdbj

All training images used depict the actress as at least 18 years old - I am not responsible for any generation results using this model file or models merged with it. I will provide no support or further updates for this model. It is a "one trick pony" model, as it can do only one kind of NSFW scene. Size for generation that works is 512x512 or up to 512x640.

LOKEAN\_PUPPYSTYLE\_POV.ckpt [e02601f3]

Photorealistic hetero doggystyle images.  
For some reason, shares short hash with Arcane Vi vimod.ckpt and lokean missionary. Probably due to how it was trained - the hash is only of a small segment near the start of the file. They are different models.  
Use **LOKEAN\_PUPPYSTYLE\_POV** to activate.  
Info and preview images https://reentry.org/kwai
