# Waifu Diffusion

## Waifu Diffusion VAE kl-f8-anime2

A finetune of the SD 1.4 VAE on 250k anime-styled images. Supposedly improves reconstruction of eyes and fingers.

Info <https://twitter.com/haruu1367/status/1579286947519864833>

Repo <https://huggingface.co/hakurei/waifu-diffusion-v1-4>

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.  
If you don't know what this is or why you would want it, don't bother with it.

# Trinart

## trinart\_characters\_19.2m\_stable\_diffusion\_v1 [d64dab7f] + VAE

A stable diffusion v1-based model trained by roughly 19.2M anime/manga style images (pre-rolled augmented images included) plus final finetuning by about 50,000 images. This model seeks for a sweet spot between artistic style versatility and anatomical quality within the given model spec of SDv1.  
This is the same version 1 model that was released in AI Novelist/TrinArt service from early September through Oct 14.  
The dataset is filtered to exclude NSFW or unsafe contents.

## Hentai Diffusion

Repo <https://huggingface.co/Deltaadams/Hentai-Diffusion/tree/main>  
Supposedly will update weekly, so check the repo, it might be more current than this listing.  
The pruned torrents below are with EMA weights removed.

This model was based on Waifu Diffusion 1.2, and trained on 150,000 images from R34 and gelbooru.  
Focused training has been done of more obscure poses such as crouching and facing away from the viewer, along with a focus on improving hands.  
Using tags from the site in prompts is recommended. Adding 1girl to the start of the prompt will help get better results.

# Bare Feet / Full Body b4\_t16\_noadd [03e33bb4] [2bd8166c] [9012c514]

High quality labels only (the "curated" model).  
Preview grid <https://i.imgur.com/2sJGz3j.jpeg>

A very WIP checkpoint focused on Bare Foot (BF) Full Body (FB) nude female images - best used if you are trying for accurate photorealistic feet or female genitalia, both of which normal SD struggles with  
It is very much WIP  
Extremely specialized, and lost a lot of general purpose capability and ability to stylize.

## Yiffy

## yiffy-e18.ckpt [50ad914b]

Based on yiffy-e15, trained for a further 3 epochs using a dataset of 210k images from e621.

This will likely be the last epoch for quite some time, because until further improvements to other parts of the network (such as a custom VAE, variable res, etc), we think that further training is not necessary because the model has converged on a decent style for now.  
**IMPORTANT NOTE:** during training explicit was misspelled as **explicit**. Using the misspelled version results in better cocks. Sorry :<

## Zack3D\_Kinky-v1.ckpt [1a75d5c6]

This is a NSFW model trained from SD v1.4, great for general furry but specializes in the kinky side of art such as Transformation, latex, tentacles, goo, ferals, bondage, and a lot more that I cant remember. Uses over 100k images all aesthetics filtered. Prompt is raw E621 tags, so with underscores.

r34\_e3.ckpt [57ea6f43]

r34 e3 (fourth epoch). Same dataset, prepended "by" to artist tags, artist recognition has improved a little bit (still needs to get better), character recognition has improved quite a bit.

Web

<https://mega.nz/file/WVggzbRa#4-pcaLeLN02bdvzUwCn2QQKoLxCC7copAJHYyG4a0B0>

r34\_e2.ckpt [778b68b1]

Third epoch, again a pretty nice improvement over the last. Dataset grew by ~3K images, with 5K removed and 8K added.

r34\_e1.ckpt [f9000e4e]

I yeeted about 30K images and then added 20K back from good artists, and lowered the LR significantly to reflect my batch size, I think it's improved significantly but I didn't save any prompts/settings from epoch0 to compare it with.

# TestFurry\_5.ckpt [b1f1855e]

Small model, trained with 40k dataset mixed furry and humans (~15k humans and 25k furry). No censorship, no speech bubbles, no comic strips. Gelbooru/e621 mixed tags. 5 epoch (still not finished but can do good results) NSFW!!  
Tags order recommendation - type (furry if furry), character, source, author, race, gender, other description tags.  
Trained on up to 225 tags, with penultimate layer (CLIP 2 in AUTO GUI)

# Dreambooth

## Hiten girl\_anime\_8k\_wallpaper\_4k.ckpt [7831dea3]

Useful for merging.  
Custom Dreambooth model based off of the artist Hiten. Dataset was 6 training images, and 34 regularization images. Trained for 4000 steps.  
Uses the Waifu Diffusion v1.2 model as a base.  
To use the model, simply insert the name 'Hiten' into your prompts. The class token used was 'girl\_anime\_8k\_wallpaper'. Append the class token after Hiten for stronger results. EX: "1girl by Hiten girl\_anime\_8k\_wallpaper"  
Info: <https://huggingface.co/BumblinOrange/Hiten>

SHA256 | 59cb5b6f2b7b9373a602d93c802ee841c367db5166a758e8d1d32464c9db1dd5

## Gawr\_Gura\_450img.ckpt [e7883abf]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Hololive Vtuber Gawr Gura. Dataset was 450 training images, and 900 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Gawr Gura' into your prompts.  
Repo: <https://huggingface.co/BumblinOrange/GuraLv400>

**Web**  
[https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr\\_Gura\\_450img.ckpt](https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr_Gura_450img.ckpt)

## Emilia\_CustReg\_3k.ckpt [2660cf9a]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Emilia from Re:Zero. Dataset was 16 training images, and 11 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Emilia' into your prompts. The class token used was 'white\_hair\_girl\_violet\_eyes'. Append the class token after Emilia for stronger results. EX: "A photo of Emilia white\_hair\_girl\_violet\_eyes"  
Repo: <https://huggingface.co/BumblinOrange/Emilia>

## Star Fox Krystal

Trained on 90 fan art images for 2500 steps on top of yiffy18. Regulation images were an even mix of about 200 low-quality generations of 4 common anthro species with a spread of gender (a new idea I hope to explain in a forthcoming guide).

This following bit of text MUST be used in your prompt, or it will do nothing!  
Trigger Phrase `thatbluefoxfromstarfoxykrystal anthro`

```
