# Contact

I have been keeping up with SD less lately, which means I am more likely to miss new models.  
If you think something is missing from this list, contact me with details.

# Stable Diffusion

## Stable Diffusion v2.0

Stable Diffusion 2.0 code  
<https://github.com/Stability-AI/stablediffusion>

768x768 model  
<https://huggingface.co/stabilityai/stable-diffusion-2>

512x512 base model  
<https://huggingface.co/stabilityai/stable-diffusion-2-base>

Depth model  
<https://huggingface.co/stabilityai/stable-diffusion-2-depth>

4x upscaler  
<https://huggingface.co/stabilityai/stable-diffusion-x4-upscaler>

## Stable Diffusion v1.5 [81761151] [a9263745]

The Stable-Diffusion-v1-5 checkpoint was initialized with the weights of the Stable-Diffusion-v1-2 checkpoint and subsequently fine-tuned on 595k steps at resolution 512x512 on "laion-aesthetics v2 5+" and 10% dropping of the text-conditioning to improve classifier-free guidance sampling.

Torrent v1-5-pruned.ckpt

This version of the model is only useful for native training. If you don't know what this is, you don't need this.

If you only want to generate images, or train dreambooth/textual inversion/hypernetworks, get v1-5-pruned-emaonly.ckpt instead.

```

Stable Diffusion VAE ft-mse-original

Resumed from ft-EMA and uses EMA weights and was trained for another 280k steps using a re-weighted loss, with more emphasis on MSE reconstruction (producing somewhat "smoother" outputs). To keep compatibility with existing models, only the decoder part was finetuned; the checkpoints can be used as a drop-in replacement for the existing autoencoder.

Repo & Info (with comparisons) <https://huggingface.co/stabilityai/sd-vae-ft-mse-original>

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.

If you don't know what this is or why you would want it, don't bother with it.

Stable Diffusion Inpainting v1.5 [3e16efc8]

Repo <https://huggingface.co/runwayml/stable-diffusion-inpainting>

Intended to be used with <https://github.com/runwayml/stable-diffusion>

The Stable-Diffusion-Inpainting was initialized with the weights of the Stable-Diffusion-v-1-2. First 595k steps regular training, then 440k steps of inpainting training at resolution 512x512 on “laion-aesthetics v2 5+” and 10% dropping of the text-conditioning to improve classifier-free classifier-free guidance sampling. For inpainting, the UNet has 5 additional input channels (4 for the encoded masked-image and 1 for the mask itself) whose weights were zero-initialized after restoring the non-inpainting checkpoint. During training, we generate synthetic masks and in 25% mask everything.

```
SHA256 c6bbcb15e3224e6973459ba78de4998b80b50112b0ae5b5c67113d56b4e366b19

# Cafe Unofficial Instagram TEST Model [50b987ae]

Trained on ~140k Instagram images made up of primarily Japanese accounts (mix of cosplay, model, and personal accounts)  
While the model can create some realistic Instagram-esque images on its own, for full potential, it is recommended that it be merged with another model (such as berry or anything)

## Torrent

# Trinart

## trinart\_characters\_19.2m\_stable\_diffusion\_v1 [d64dab7f] + VAE

A stable diffusion v1-based model trained by roughly 19.2M anime/manga style images (pre-rolled augmented images included) plus final finetuning by about 50,000 images. This model seeks for a sweet spot between artistic style versatility and anatomical quality within the given model spec of SDv1. This is the same version 1 model that was released in AI Novelist/TrinArt service from early September through Oct 14. The dataset is filtered to exclude NSFW or unsafe contents.

# SmirkingFace

SmirkingFace is a project that aims to finetune the Stable Diffusion model with high quality erotic content and allow it to generate a large variety of erotic content. In case you're uncertain which model you need, the EB 1.0 EMA model tends to perform well in many cases. EBL 1.0 has been trained for the longest, but will require code for our modified model to work (released on our github).  
Note: All our models include the updated MSE VAE released by Stability AI.

## SXD-v0.8

Hardcore sex act model with realistic tentacle porn as a side project. Made with smirkingface's SD repo. Both pruned and full versions available

Web

<https://pixeldrain.com/l/hNc8DomC>

## Pyro's

### Pyro's Blowjob Model v1.0 [9b5251e8]

Photorealistic

Current dreambooth based blowjob models suck dick (heh), so I decided to do a "real" take on this and fine-tune it the native way (like eg. WaifuDiffusion did with their model)  
Base model: SD 1.5  
2899 input images  
23192 steps x batch size 4  
LR 5e-06

Info and potentially newer versions: <https://reentry.org/pyros-sd-model>

easter\_e5 [da453598]

General lewd model, "Easter.ckpt"! Trained on about 180k images from gelbooru and e621.  
NSFW and niche content is included. I take no responsibility for the model's outputs!  
Model seems better at the front than the back.  
Suggested negative prompt: "Letterbox".  
The name comes from its tendency to mix rabbits and eggs.

Bare Feet / Full Body b4\_t16\_noadd [03e33bb4] [2bd8166c] [9012c514]

High quality labels only (the "curated" model).  
Preview grid <https://i.imgur.com/2sJGz3j.jpeg>

A very WIP checkpoint focused on Bare Foot (BF) Full Body (FB) nude female images - best used if you are trying for accurate photorealistic feet or female genitalia, both of which normal SD struggles with  
It is very much WIP  
Extremely specialized, and lost a lot of general purpose capability and ability to stylize.

Yiffy

yiffy-e18.ckpt [50ad914b]

Based on yiffy-e15, trained for a further 3 epochs using a dataset of 210k images from e621.

This will likely be the last epoch for quite some time, because until further improvements to other parts of the network (such as a custom VAE, variable res, etc), we think that further training is not necessary because the model has converged on a decent style for now.  
**IMPORTANT NOTE:** during training explicit was misspelled as **explicit**. Using the misspelled version results in better cocks. Sorry :<

yiffy-e13.ckpt [778b38ae]

first 4 epochs were trained on ~70k images with lama infilling (the cause of all of our headaches, because the network found a pattern in the edges and started replicating it everywhere)  
next 6 epochs were trained on ~120k images with random cropping and a lower LR  
last epochs were done on a different dataset, not bigger than 150k  
**IMPORTANT NOTE:** during training explicit was misspelled as **explicit**. Using the misspelled version results in better cocks. Sorry :<

# SnackBar-General-V1-E11 [16d5a5c7]

This model was trained with waifu diffusion using the top 300k images on e621 with certain tags. Use e621 tags in prompts with underscores. You might get better results if you order them as follows:

[safe/questionable/explicit]\_content [artist] [copyrights] [characters] [species] [general]

For better results, set 'Stop At last layers of CLIP model' in the webui settings to 2.  
Sample images:

## Zack3D\_Kinky-v1.ckpt [1a75d5c6]

This is a NSFW model trained from SD v1.4, great for general furry but specializes in the kinky side of art such as Transformation, latex, tentacles, goo, ferals, bondage, and a lot more that I cant remember. Uses over 100k images all aesthetics filtered.  
Prompt is raw E621 tags, so with underscores.

r34\_e1.ckpt [f9000e4e]

I yeeted about 30K images and then added 20K back from good artists, and lowered the LR significantly to reflect my batch size, I think it's improved significantly but I didn't save any prompts/settings from epoch0 to compare it with.

# sd-wikiart-v2.ckpt. [8f32b8df]

sd-wikiart-v2 is a stable diffusion model that has been fine-tuned on the wikiart dataset to generate artistic images in different style and genres.  
The current model has been fine-tuned with a learning rate of 1e-05 for 1 epoch on 81K text-image pairs from wikiart dataset. Only the attention layers of the model are fine-tuned. This is done to avoid catastrophic forgetting, the model can generate artistic images given specific prompts but still retains most of its previous knowledge.

Info <https://huggingface.co/valhalla/sd-wikiart-v2>

# Pachu-Diffusion [54d5d199]

This fine-tuned Stable Diffusion v1.5 model was trained for 8000 iterations on the works of Pachu M. Torres. Training was performed using ShivamShrirao/diffusers with full precision, prior-preservation loss, the train-text-encoder feature, and the new 1.5 MSE VAE from Stability AI. A total of 4120 regularization / class images were used. Regularization images were generated using the prompt "artwork style", 50 DDIM steps, and a CFG of 7. Use the tokens `pachu artwork style` in your prompts for the effect.

Repo <https://huggingface.co/ProGamerGov/Pachu-Diffusion>

## Web

# TestFurry\_5.ckpt [b1f1855e]

Small model, trained with 40k dataset mixed furry and humans (~15k humans and 25k furry). No censorship, no speech bubbles, no comic strips. Gelbooru/e621 mixed tags. 5 epoch (still not finished but can do good results) NSFW!!  
Tags order recommendation - type (furry if furry), character, source, author, race, gender, other description tags.  
Trained on up to 225 tags, with penultimate layer (CLIP 2 in AUTO GUI)

## Torrent

# cookie\_sd\_pony\_run\_a12 [2ce7dcf5] [67ff5385]

This is the "Cookie A12" model.  
Trained on 300k Derpibooru images with [score.gt:100](#) for 2172700 steps.

New features;

- Improved VAE
- Improved CLIP Text Encoder
- Generate images at any aspect ratio
- Generate any derpibooru artist or OC to high accuracy.
- Generate Anthro, Humanized, EqG, Dragon?, whatever exists in derpibooru.
- Generate high quality results without "magic words" (<https://u.smuttery.horse/mjzakocpxtf.png>)
- No censored tags or data, NSFW+SFW.

Note:  
Keep CLIP Skip off. The improved CLIP will break if you skip any layers.

Samples:  
<https://u.smuttery.horse/mjzakocpxtf.png>

pony-diffusion

pony-diffusion-v2 [5bdc40aa]

pony-diffusion is a latent text-to-image diffusion model that has been conditioned on high-quality pony and furry SFW and NSFW images through fine-tuning. WARNING: Compared to v1 of this model, v2 is much more capable of producing NSFW content so it's recommended to use 'safe' tag in prompt in combination with negative prompt for image features you may want to suppress. v2 model also has a slight 3d bias so negative prompts like '3d' or 'sfm' should be used to better match v1 outputs.

Repo <https://huggingface.co/AstraliteHeart/pony-diffusion-v2>

## Dreambooth

## Hiten girl\_anime\_8k\_wallpaper\_4k.ckpt [7831dea3]

Useful for merging.  
Custom Dreambooth model based off of the artist Hiten. Dataset was 6 training images, and 34 regularization images. Trained for 4000 steps.  
Uses the Waifu Diffusion v1.2 model as a base.  
To use the model, simply insert the name 'Hiten' into your prompts. The class token used was 'girl\_anime\_8k\_wallpaper'. Append the class token after Hiten for stronger results.  
EX: "1girl by Hiten girl\_anime\_8k\_wallpaper"  
Info: <https://huggingface.co/BumblingOrange/Hiten>

**SHA256** | 59cb5b6f2b7b9373a602d93c802ee841c367db5166a758e8d1d32464c9db1dd5

## Gawr\_Gura\_450img.ckpt [e7883abf]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Hololive Vtuber Gawr Gura. Dataset was 450 training images, and 900 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Gawr Gura' into your prompts.  
Repo: <https://huggingface.co/BumblinOrange/GuraLv400>  
Web

[https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr\\_Gura\\_450img.ckpt](https://huggingface.co/BumblinOrange/GuraLv400/resolve/main/Gawr_Gura_450img.ckpt)

## Emilia\_CustReg\_3k.ckpt [2660cf9a]

Based on Waifu Diffusion v1.2  
Custom Dreambooth model based off of the likeness of Emilia from Re:Zero. Dataset was 16 training images, and 11 regularization images. Trained for 3000 steps.  
To use the model, simply insert the name 'Emilia' into your prompts. The class token used was 'white\_hair\_girl\_violet\_eyes'. Append the class token after Emilia for stronger results. EX: "A photo of Emilia white\_hair\_girl\_violet\_eyes"  
Repo: <https://huggingface.co/BumblinOrange/Emilia>

[https://huggingface.co/BumblinOrange/Emilia/resolve/main/Emilia\\_CustReg\\_3k.ckpt](https://huggingface.co/BumblinOrange/Emilia/resolve/main/Emilia_CustReg_3k.ckpt)

## Star Fox Krystal

Trained on 90 fan art images for 2500 steps on top of yiffy18. Regulation images were an even mix of about 200 low-quality generations of 4 common anthro species with a spread of gender (a new idea I hope to explain in a forthcoming guide).  
This following bit of text MUST be used in your prompt, or it will do nothing!  
Trigger Phrase `thatbluefoxfromstarfoxkrystal anthro`

Gyokai/onono imoko

the best model for coherency is gyokaidreambooth\_1000.  
gyokaidreambooth\_2000 starts to ignore prompt words but is very consistent in style.  
Use term **gyokai** under class **lgirl**  
e.g illustration of **gyokai** **lgirl**  
works well with **multicolored hair, colorful, halftone, polka dot**  
protip: the model works well when paired with **gyokai-zen** **HN** at 0.85 strength.  
gyokai-zen: <https://mega.nz/file/67AUDQ4K#8n4bzcxGGUGaAVy7wLXvVib0jhVjt2wPS-jsoCxcCus>

Blacked POV blowjob [8467f44f]

dreambooth-bkdbj-4000step-pruned-fp16.ckpt

Blacked POV blowjob model, trained for 4000 steps on 70 hand picked photos from [blacked.com](#), trained on top of SD 1.4 model using Dreambooth. Keyword for prompt: **bkdbj**  
All training images used depict the actress as at least 18 years old - I am not responsible for any generation results using this model file or models merged with it. I will provide no support or further updates for this model. It is a "one trick pony" model, as it can do only one kind of NSFW scene. Size for generation that works is 512x512 or up to 512x640.

# bukkake [b4a14787]

bukkake\_20\_training\_images\_2020\_max\_training\_steps\_woman\_class\_word.ckpt

SD1.4 + Dreambooth

```
A good prompt to test is is "portrait of bukkake woman, cute girl, sexy, beautiful girl, photograph, nikon d4, f/2.8, 70mm, topless"
Tip: Do NOT use face restore if you are trying to do txt2img to achieve any kind of realistic cum on a realistic face. Both currently available face restore models (GPFGAN and
Codeformer) completely remove or ruin cum on face. Hopefully another coomer will come up with a new face restore model that ignores liquids on faces and still fixes the
underlying face
```

## Torrent

DCAU [2fd6057b]

A model for the DC animated universe. Currently it has only been trained on Batman the Animated Series, but there are plans to include all the shows.

Repo (with samples) <https://huggingface.co/IShallRiseAgain/DCAU>

See the repo for potential newer versions.

Prompt is currently `Batman_the_animated_series`.

Web

https://huggingface.co/IShallRiseAgain/DCAU/resolve/main/DCAUV1.ckpt

Raven anime.ckpt

'anime' model - A newer model. It is a bit undertrained for more flexibility. It can create more complicated images with greater stability, but with a stronger anime style. Tag & classname require more emphasis / attention than the 'Western' model. Try (RavenRoth woman:1.2). It is a bit undertrained for more flexibility - may need to use 'grey skin' in the prompt. (RavenRoth woman:1.2) with grey skin. Tag & classname: `RavenRoth woman`

Web

https://mega.nz/folder/4KLHFQaL#NBqANoiG3E7mz3apn85Q0g

Raven Western.ckpt

This is an earlier Dreambooth model I created. It has a style more true to the Teen Titans cartoon and Zone art. I noticed how negative prompts can cause the model to shift away from a cartoon / Zone art style, so be careful with negative prompts if you find this. A negative prompt of: 'lowres, (bad anatomy), bad hands, text, error, missing fingers, extra digit, fewer digits, cropped, worst quality, jpeg artifacts, >signature, watermark, username, blurry, artist name' works well. I think the AI considers the thick line art style to be 'low quality' and for Raven to be 'deformed' or 'mutant', due to the grey skin. Try lower CFG Scale (closer to 5) for more flexibility. You may even want to try `[RavenRoth anime_girl]` Tag & classname: `RavenRoth anime_girl`

Web

https://mega.nz/folder/4KLHFQaL#NBqANoiG3E7mz3apn85Q0g

oshinobu-pruned.ckpt

Dataset Size: 63 fanart images that resemble the anime character design (just 3 or 4 are NSFW)  
Steps: 9450 (~6 epochs)  
Base Model: Waifu Diffusion v1.3  
Trigger Phrase (Identifier + Class): `illustration of a oshinobu blonde_loli`  
Because of the training data used, generated images keep her typical round blush (most of times).  
Now, I think I used an insane amount of steps and images, but when I trained this (one week ago) I had no idea what I was exactly doing.

## Latex's Abandoned Style

This style is based on the artist Latex, an artist who used to do latex/latex tf but one day completely changed their art style, scrubbed their old images from most of the internet, and moved away from making latex (but kept the name ironically). Luckily I have a dump of their old art, so finally there is a way to remake one of my favorite styles of latex/goos art. I have attached some quick imperfect gens to check a look at. Im sure you guys will surpass me very very quickly.

Phrase in prompt: latex\_artist art

Repo <https://huggingface.co/prompthero/midjourney-v4-diffusion>

## Web

<https://huggingface.co/prompthero/midjourney-v4-diffusion/resolve/main/mdjrny-v4.ckpt>

# BloodborneDiffusion

This is a Dreamboothed Stable Diffusion model trained on the Bloodborne series Style.  
The total dataset is made of 100 pictures, and the training has been done on runawayml 1.5 and the new VAE, with 12k steps (poly LR1e-6).  
The token Bloodborne Style will bring in the new concept.  
The recommended sampling is k\_Euler\_a or DPM++ 2M Karras on 20 steps, CFGS 7 .

Repo <https://huggingface.co/Guizmus/BloodborneDiffusion>

## Web

<https://huggingface.co/Guizmus/BloodborneDiffusion/resolve/main/BloodborneStyle-v1.ckpt>

# samdoesarts\_style [85b77ff9]

This is a dreambooth model trained on the works of Sam Yang(samdoesarts).  
trained with automatic1111 dreambooth extension  
13000 steps 128 training images (256 flipped) 1500 class images 1e-6 learning rate  
token for this model is  **samdoesarts style**

Complex-Linear

Trained on around 100 images at 768x768 resolution.  
Use prompt: ComplexLA style  
Use resolution near 768x768, lower resolution works but quality will not be as good.
