Stable Diffusion Models

Contact

I have been keeping up with SD less lately, which means I am more likely to miss new models.
If you think something is missing from this list, contact me with details.

Stable Diffusion

Stable Diffusion v1.5 [81761151] [a9263745]

The Stable-Diffusion-v1-5 checkpoint was initialized with the weights of the Stable-Diffusion-v1-2 checkpoint and subsequently fine-tuned on 595k steps at resolution 512x512 on "laion-aesthetics v2 5+" and 10% dropping of the text-conditioning to improve classifier-free guidance sampling.

Torrent v1-5-pruned.ckpt

This version of the model is only useful for native training. If you don't know what this is, you don't need this.
If you only want to generate images, or train dreambooth/textual inversion/hypernetworks, get v1-5-pruned-emaonly.ckpt instead.

Stable Diffusion VAE ft-mse-original

Resumed from ft-EMA and uses EMA weights and was trained for another 280k steps using a re-weighted loss, with more emphasis on MSE reconstruction (producing somewhat "smoother" outputs). To keep compatibility with existing models, only the decoder part was finetuned; the checkpoints can be used as a drop-in replacement for the existing autoencoder.
Repo & Info (with comparisons) https://huggingface.co/stabilityai/sd-vae-ft-mse-original

A VAE is not the same as the other models on this list. It is not a complete model that can be used to generate images alone, but a component to be used in tandem with other models.
If you don't know what this is or why you would want it, don't bother with it.

```

Stable Diffusion VAE ft-ema-original

Resumed from the original checkpoint, trained for 313198 steps and uses EMA weights. To keep compatibility with existing models, only the decoder part was finetuned; the checkpoints can be used as a drop-in replacement for the existing autoencoder.
Repo & Info (with comparisons) https://huggingface.co/stabilityai/sd-vae-ft-ema-original

Stable Diffusion Inpainting v1.5 [3e16efc8]

Repo https://huggingface.co/runwayml/stable-diffusion-inpainting
Intended to be used with https://github.com/runwayml/stable-diffusion

The Stable-Diffusion-Inpainting was initialized with the weights of the Stable-Diffusion-v-1-2. First 595k steps regular training, then 440k steps of inpainting training at resolution 512x512 on "laion-aesthetics v2 5+" and 10% dropping of the text-conditioning to improve classifier-free classifier-free guidance sampling. For inpainting, the UNet has 5 additional input channels (4 for the encoded masked-image and 1 for the mask itself) whose weights were zero-initialized after restoring the non-inpainting checkpoint. During training, we generate synthetic masks and in 25% mask everything.

Trinart

trinart_characters_19.2m_stable_diffusion_v1 [d64dab7f] + VAE

A stable diffusion v1-based model trained by roughly 19.2M anime/manga style images (pre-rolled augmented images included) plus final finetuning by about 50,000 images. This model seeks for a sweet spot between artistic style versatility and anatomical quality within the given model spec of SDv1.
This is the same version 1 model that was released in AI Novelist/TrinArt service from early September through Oct 14.
The dataset is filtered to exclude NSFW or unsafe contents.

SmirkingFace

SmirkingFace is a project that aims to finetune the Stable Diffusion model with high quality erotic content and allow it to generate a large variety of erotic content.
In case you're uncertain which model you need, the EB 1.0 EMA model tends to perform well in many cases. EBL 1.0 has been trained for the longest, but will require code for our modified model to work (released on our github).
Note: All our models include the updated MSE VAE released by Stability AI.

EBL 1.0 [758fda47]

Model using an extended architecture (1.8B parameters), resumed from EB 1.0. Trained on a wide variety of erotic photos with a large variety in poses.
Won't work out of the box with webui (currently, at least).
Code https://github.com/smirkingface/stable-diffusion
Info https://www.patreon.com/posts/released-models-73689798
Running with auto's webui https://www.patreon.com/posts/running-extended-73768212
General usage instructions with previews https://www.patreon.com/posts/73775030

SF_EBL_1.0_vae.ckpt [758fda47] **SHA256** e237715adaf1b3e43eb2eee792fe82a90d01a45beb79d38807f5ca92b7a277db

Hentai Diffusion

Repo https://huggingface.co/Deltaadams/Hentai-Diffusion/tree/main
Supposedly will update weekly, so check the repo, it might be more current than this listing.
The pruned torrents below are with EMA weights removed.

> This model was based on Waifu Diffusion 1.2, and trained on 150,000 images from R34 and gelbooru.
> Focused training has been done of more obscure poses such as crouching and facing away from the viewer, along with a focus on improving hands.
> Using tags from the site in prompts is recommended. Adding 1girl to the start of the prompt will help get better results.

Zack3D_Kinky-v1.ckpt [1a75d5c6]

This is a NSFW model trained from SD v1.4, great for general furry but specializes in the kinky side of art such as Transformation, latex, tentacles, goo, ferals, bondage, and a lot more that I cant remember. Uses over 100k images all aesthetics filtered. Prompt is raw E621 tags, so with underscores.

sd-wikiart-v2.ckpt. [8f32b8df]

> sd-wikiart-v2 is a stable diffusion model that has been fine-tuned on the wikiart dataset to generate artistic images in different style and genres.
> The current model has been fine-tuned with a learning rate of 1e-05 for 1 epoch on 81K text-image pairs from wikiart dataset. Only the attention layers of the model are fine-tuned. This is done to avoid catastrophic forgetting, the model can generate artistic images given specific prompts but still retains most of its previous knowledge.

Pachu-Diffusion [54d5d199]

> This fine-tuned Stable Diffusion v1.5 model was trained for 8000 iterations on the works of Pachu M. Torres. Training was performed using ShivamShrirao/diffusers with full precision, prior-preservation loss, the train-text-encoder feature, and the new 1.5 MSE VAE from Stability AI. A total of 4120 regularization / class images were used. Regularization images were generated using the prompt "artwork style", 50 DDIM steps, and a CFG of 7.
> Use the tokens `pachu artwork style` in your prompts for the effect.

TestFurry_5.ckpt [b1f1855e]

> Small model, trained with 40k dataset mixed furry and humans (~15k humans and 25k furry). No censorship, no speech bubbles, no comic strips. Gelbooru/e621 mixed tags. 5 epoch (still not finished but can do good results) NSFW!!
> Tags order recommendation - type (furry if furry), character, source, author, race, gender, other description tags.
> Trained on up to 225 tags, with penultimate layer (CLIP 2 in AUTO GUI)

cookie_sd_pony_run_a12 [2ce7dcf5] [67ff5385]

> This is the "Cookie A12" model.
> Trained on 300k Derpibooru images with score.gt:100 for 2172700 steps.

New features;

- Improved VAE
- Improved CLIP Text Encoder
- Generate images at any aspect ratio
- Generate any derpibooru artist or OC to high accuracy.
- Generate Anthro, Humanized, EqG, Dragon?, whatever exists in derpibooru.
- Generate high quality results without "magic words" (https://u.smutty.horse/mjzakocpxtf.png)
- No censored tags or data, NSFW+SFW.

Note:
Keep CLIP Skip off. The improved CLIP will break if you skip any layers.

Samples:

pony-diffusion

pony-diffusion-v2 [5bdc40aa]

pony-diffusion is a latent text-to-image diffusion model that has been conditioned on high-quality pony and furry SFW and NSFW images through fine-tuning.
WARNING: Compared to v1 of this model, v2 is much more capable of producing NSFW content so it's recommended to use 'safe' tag in prompt in combination with negative prompt for image features you may want to suppress. v2 model also has a slight 3d bias so negative prompts like '3d' or 'sfm' should be used to better match v1 outputs.

```

pony-diffusion-v1 [9070b574]

Fine-tuned on top of an early checkpoint of Waifu Diffusion with a learning rate of 5.0e-6 for 4 epochs on approximately 80k pony text-image pairs (using tags from derpibooru) which all have score greater than 500 and belong to categories `safe` or `suggestive`.

Dreambooth

Hiten girl_anime_8k_wallpaper_4k.ckpt [7831dea3]

Useful for merging.
Custom Dreambooth model based off of the artist Hiten. Dataset was 6 training images, and 34 regularization images. Trained for 4000 steps.
Uses the Waifu Diffusion v1.2 model as a base.
To use the model, simply insert the name 'Hiten' into your prompts. The class token used was 'girl_anime_8k_wallpaper'. Append the class token after Hiten for stronger results. EX: "1girl by Hiten girl_anime_8k_wallpaper"
Info: https://huggingface.co/BumblingOrange/Hiten

SHA256 | 59cb5b6f2b7b9373a602d93c802ee841c367db5166a758e8d1d32464c9db1dd5

Blacked POV blowjob [8467f44f]

dreambooth-bkdbj-4000step-pruned-fp16.ckpt

Blacked POV blowjob model, trained for 4000 steps on 70 hand picked photos from blacked.com, trained on top of SD 1.4 model using
Dreambooth. Keyword for prompt: `bkdbj`
All training images used depict the actress as at least 18 years old - I am not responsible for any generation results using this model file or
models merged with it. I will provide no support or further updates for this model. It is a "one trick pony" model, as it can do only one kind of
NSFW scene. Size for generation that works is 512x512 or up to 512x640.

Torrent

elden-ring-diffusion [16d77205]

This is the fine-tuned Stable Diffusion model trained on the game art from Elden Ring.
Use the tokens `elden ring style` in your prompts for the effect.
Repo https://huggingface.co/nitrosocke/elden-ring-diffusion
Check the repo for potential newer versions.

Web

```
https://huggingface.co/nitrosocke/elden-ring-diffusion/resolve/main/eldenring-v2-pruned.ckpt
```

modern-disney-diffusion [ccf3615f]

This is the fine-tuned Stable Diffusion model trained on screenshots from a popular animation studio.
Use the tokens `modern disney style` in your prompts for the effect.
Repo https://huggingface.co/nitrosocke/mo-di-diffusion
Check the repo for potential newer versions.

Web

> https://huggingface.co/nitrosocke/mo-di-diffusion/resolve/main/moDi-v1-pruned.ckpt

Arcane-Diffusion [318a302e]

This is the fine-tuned Stable Diffusion model trained on images from the TV Show Arcane.
Use the tokens `arcane style` in your prompts for the effect.
Repo https://huggingface.co/nitrosocke/Arcane-Diffusion
Check the repo for potential newer versions.

Web

> https://huggingface.co/nitrosocke/Arcane-Diffusion/resolve/main/arcane-diffusion-v3.ckpt

classic-anim-diffusion [be7ddafc]

This is the fine-tuned Stable Diffusion model trained on screenshots from a popular animation studio.
Use the tokens `classic disney style` in your prompts for the effect.
Repo https://huggingface.co/nitrosocke/classic-anim-diffusion
Check the repo for potential newer versions.
